PROFESSIONAL SUMMARY

Results driven Software Engineer with experience shipping production features in Agile/Scrum teams. Proficient in Next.js, React, TypeScript, and ASP.NET Core ,from database design to pixel perfect UI. Proven ability to independently architect and deploy full stack applications used by real users, while collaborating effectively within cross functional sprint teams.

TECHNICAL SKILLS

Frontend: Next.js · React.js · TypeScript · JavaScript · Tailwind CSS · Bootstrap · HTML · CSS · Context API · TanStack

Backend: ASP.NET Core Web API · ASP.NET Core MVC · C# · Python · Java · SQL · SQL Server

Agile & Tools: Scrum · Azure DevOps · Git · GitHub · Postman · Jira

Familiar: Strapi · Oracle · Flutter · Dart

WORK EXPERIENCE

Software Developer · Jodayn · Hail, SA — Mar 2025 – Present

- Delivered responsive UI screens across multiple sprints using Tailwind CSS and Bootstrap, collaborating within Agile/Scrum team with daily stand ups and Azure DevOps sprint tracking.
- Designed and implemented database schemas and ERD diagrams that reduced structural rework during sprint reviews; authored use case and activity diagrams adopted into the project's SRS documentation.
- Identified and resolved several critical bugs during QA cycles before production release, improving release stability and reducing post-deployment defect rate.
- Integrated and validated ASP.NET Core Web API endpoints using Postman, ensuring consistent and reliable data exchange between frontend and backend services.

Frontend Developer Intern · Jodayn · Hail, SA — Oct 2024 – Mar 2025

- Built responsive web pages using Next.js and Tailwind CSS, delivering pixel-perfect layouts in collaboration with UI/UX designers within an Agile team structure.

IT Support Co-op · King Khaled Hospital · Hail, SA — Jun – Dec 2024

- Managed Active Directory infrastructure and resolved hardware, software, and network issues across hospital departments, maintaining critical system uptime.

PROJECTS

Imtithal https://qa-flow-eight.vercel.app/: AI Site Inspection for the Saudi Building Code · ***Next.js, TypeScript, Tailwind, TanStack Query, ASP.NET Core, EF Core, SQL Server, Gemini API***

- Built a full-stack platform that links every construction site finding to a Saudi Building Code (SBC 2024) clause.
- Integrated a vision LLM that drafts the finding from a site photo and suggests the matching clause. It ranks engineer verified library clauses first and strips unverified section numbers, so the AI never invents code citations.
- Designed an evidence gated workflow: fixes need photo proof and owner approval, and project phases stay locked until all their findings are closed. Each phase produces a printable report.
- Added AI review of drawings against the code, Fuse.js duplicate detection, live KPI dashboards, Excel import/export, and a full Arabic/English RTL interface.

EDUCATION

B.Sc. Computer Science – Software Engineering . University of Hail, Saudi Arabia — GPA: 3.24 · Dec 2024

CERTIFICATIONS & ACTIVITIES

- Professional Engineer – Software Engineering — Saudi Council of Engineers (SCE)
- SADAIA Hackathon — Participant
- NASA Space Apps Challenge — Participant
- Meta React Specialization
